## Product Information

**Manufacturer:** Phoenix

---

**Model:** PHP-2150

---

**Price:** MSRP from the mid-\$9,000's

---

**State:** New

---

**Type:** Turntable

---

**Structure:** High Profile

---

**Controls:** Semi-Automatic

---

**Film Carriage:** Powered Pre-Stretch

---

## Phoenix PHP-2150 Pallet Stretch Wrapper

This is a popular product, meeting the demand for a heavy duty, portable, high profile turntable, with semi-automatic controls, with a pre-stretch film carriage, and a full array of available options to meet most any need.

### ADVANTAGES

- More robust turntable support system
- Semi-automatic machine, does not require the active participation of the operator throughout the whole wrap cycle, allowing him/her to work productively elsewhere while the load is wrapped automatically
- Pre-stretch film carriage maximizes the stretching of the film, significantly reducing the cost of packaging per load
- Pre-stretch produces superior shipping package
- An array of available options accommodates needs for over-sized loads and wrap pattern variations
- Fork lift portable
- No air supply required
- Minimal installation costs

### DISADVANTAGES

- Reduced maximum load wrap height capacity
- Does not accommodate a loading ramp (i.e. fork truck loading only)
- Requires operator to manually load the turntable, attach the film to the load, start the wrap cycle, cut and seal the film, and remove the load from the turntable
- Load supporting turntable has maximum load weight limitations
- May not be suitable for unstable loads which cannot accommodate rotation

### Common Options:

- Height extension (taller loads)
- Base extension (wider loads)
- 30" film carriage
- Automatic end of cycle film cut off
- Turntable capacity upgrade
- Turntable diameter upgrade
- Electronic scale package

### SPECIFICATIONS:

**Performance:**

- Rotation Speed: 0-15 RPM
- Loads Per Hour: Up to 40 LPH (Dependant upon wrap pattern selection, loading method, and operator proficiency.)

**Load Specifications:**

- Maximum Load Size: 56" W x 56" L x 80" H (80" Load diagonal)
- Maximum Load Weight: 5,000 lbs

**Film Delivery:**

- Film Delivery: "Easy Thread" pre-stretch film carriage
- Pre-stretch: 245% factory default (other pre-stretch levels available)
- Post-stretch: Electronic film tension control
- Film Type: Machine film, 20" Roll width, 10" Diameter, 3" Core

**Rotation System:**

- Turntable Rotation System: Chain driven, AC Motor, Allen-Bradley PowerFlex VFD
- Turntable Diameter: 48" octagonal table
- Support: 7x high capacity table support casters

**Lift System:**

- Film Carriage Lift: Chain driven, AC Motor, Allen-Bradley PowerFlex VFD

**Power Requirements:**

- Power Requirement: 120 VAC /15 A / 60 HZ
- Pneumatic Requirement: none

**Controls:**

- Controller: Allen-Bradley PLC
- Operator Interface: Keypad control panel with a digital display
- Wrap Programs: Wrap up/down, wrap up only, and top cover pause
- Wrap Parameters: Separate top bottom wrap counts (1 to 9), separate up/down carriage speeds, variable turntable speed, auto height photoeye, cycle pause, and reinforce wrap

**Cut and Seal:**

- Manual process, by operator

**Construction:**

- Frame: Welded steel
- Portability: Forklift tubes, front and back

**Warranty:**

- 5 years on all parts
- 10 years on frame
- Lifetime warranty on pre-stretch rollers

**Video:**

---

**Delivery:** Typically 3 to 6 weeks for standard machine (dependant upon current shop loading and options chosen)

Yes \$0.00

---

Phoenix Option, HP - Epoxy Based Paint for Basic Semi Automatic (ALL) [Special Order]

Yes \$0.00

---

Special requests or requirements:

\* All products are designed for operation in a typical warehouse environment (dry, clean, heated).

Options may be available to adapt these machines for operation in other environments (eg. cold, wet, dusty, etc.).

*Operation of these machines in conditions for which they were not designed might reduce the life expectancy of the machine and/or negate the warranty.*
