

# OCTOPUS™

## “C” Series Automatic Rotary Ring Stretch Wrapper

- **Economical and Reliable**

Wraps up to 45 loads per hour depending on load size and wrap pattern

- **Dependable Construction Minimizes Maintenance**

Compact, aluminum frame structure along with a well balanced ring and belted lifting device results in quiet, efficient performance and minimal maintenance

*Shown with optional gravity type load stabilizer.*

- **Simple Installation Saves Time, Money and Space**

Requires minimal assembly and less floor space compared to most other styles of wrappers

- **Numerous Benefits to Rotary Ring Design**

Open top sanitary design, ability to handle variable loads and ease of performing maintenance provide a distinct advantage

- **Film Savings and Unmatched Flexibility**

Easy load “S” style film carriage ensures a higher, more consistent pre-stretch while the ring design allows for unlimited wrap patterns and reduced film usage

The unique and original Octopus ring wrapper has been upgraded to incorporate the latest technology. It is fast, efficient and versatile.

# OCTOPUS™

The Octopus "C" models: 1717

## Octopus features

- Entry level Octopus loaded with benefits
- Compact design fits where other machines cannot
- Easy to install and simple to use.

The **OCTOPUS** compact, aluminum frame version is a fully automatic pallet wrapping machine incorporating the latest technology and the famous **OCTOPUS** ring type method. The wrapping film reel is suspended from a ring and it revolves around the pallet. The ring is raised and lowered according to the wrapping program. The pallet remains stationary, which makes the wrapping of unstable and "lightweight" products considerably easier. There are no centrifugal forces to cause stress or strain on the load or on the equipment. As the ring can be accurately positioned in the vertical direction, wrapping can be started and finished at any height required. The **OCTOPUS** provides optimal load containment while minimizing film usage.

## "S" style film carriage

This unique, easy to load film carriage design provides all of the benefits of an "S" wrap while still being very user friendly. Compared to traditional "W" wrap systems, the positive contact of the "S" wrap pattern improves pre-stretch levels, can better handle a variety of films, reduces wear and significantly lowers the overall cost of ownership.

Positive contact "S" wrap design

*A reliable and economical solution for wrapping pallets. Although compact in size, it is versatile enough to handle a variety of applications. The Octopus is silent in operation and easily maintained. With its color touchscreen controls, it provides unmatched flexibility in creating the optimal wrap pattern for your specific stretch packaging challenge.*

## Options

- **Gravity load stabilizer** ensures unstable loads remain intact throughout the wrapping operation.
- **Roping device** creates reinforcement at the bottom of the film for added load stability.
- **Pallet lift device** raises the load above the conveyor to allow it to be wrapped more securely to the pallet.
- **And many more . . .**

*Color touchscreen controls allow for simple operation and superior flexibility.*

*The "S" style film carriage is easy to load and reduces downtime. It features a very efficient and consistent power pre-stretch system that helps minimize film usage.*
